Environmental Precautions: Prevent spilled material from entering drains or watercourses. Contain spill and absorb with earth, sand, clay or other absorbent material.

Spill: Isolate area and keep unauthorized people away. Do not walk through spilled material. Avoid breathing vapours and skin contact. Remove sources of ignition if combustible or flammable vapours may be present and ventilate area. Use recommended protective equipment to dike contaminated area with absorbent granules, soil, sand, etc. If large spill occurs, material should be recovered. Small spills can be absorbed with absorbent granules, spill control pads or any absorbent material. Carefully sweep up absorbed spilled material. Place in covered container for reuse or disposal. Scrub contaminated area with alcohol and caustic solution and/or detergent and water. Rinse with water. Use dry absorbent material such as clay granules to absorb and collect wash solution for proper disposal according to Section 13 of this document. Contaminated soil may have to be removed and
