HANDLING OF CHEMICALS

Good ventilation must be present when handling powders & toxic products

Empty containers must be removed as per procedure

Wear masks, eye protection & protective clothing when handling chemical products

Protective clothing & equipment may NOT be stored inside the chemical storage area

Always keep the chemical storage area clean after working with chemicals

Scales should be cleaned & calibrated regularly

Chemicals that are weighed, should be used immediately or placed back into the correct containers

Only the responsible person may receive the chemicals

Only store chemicals in their original containers

Broken or leaking containers should be placed in a container suitable for that purpose

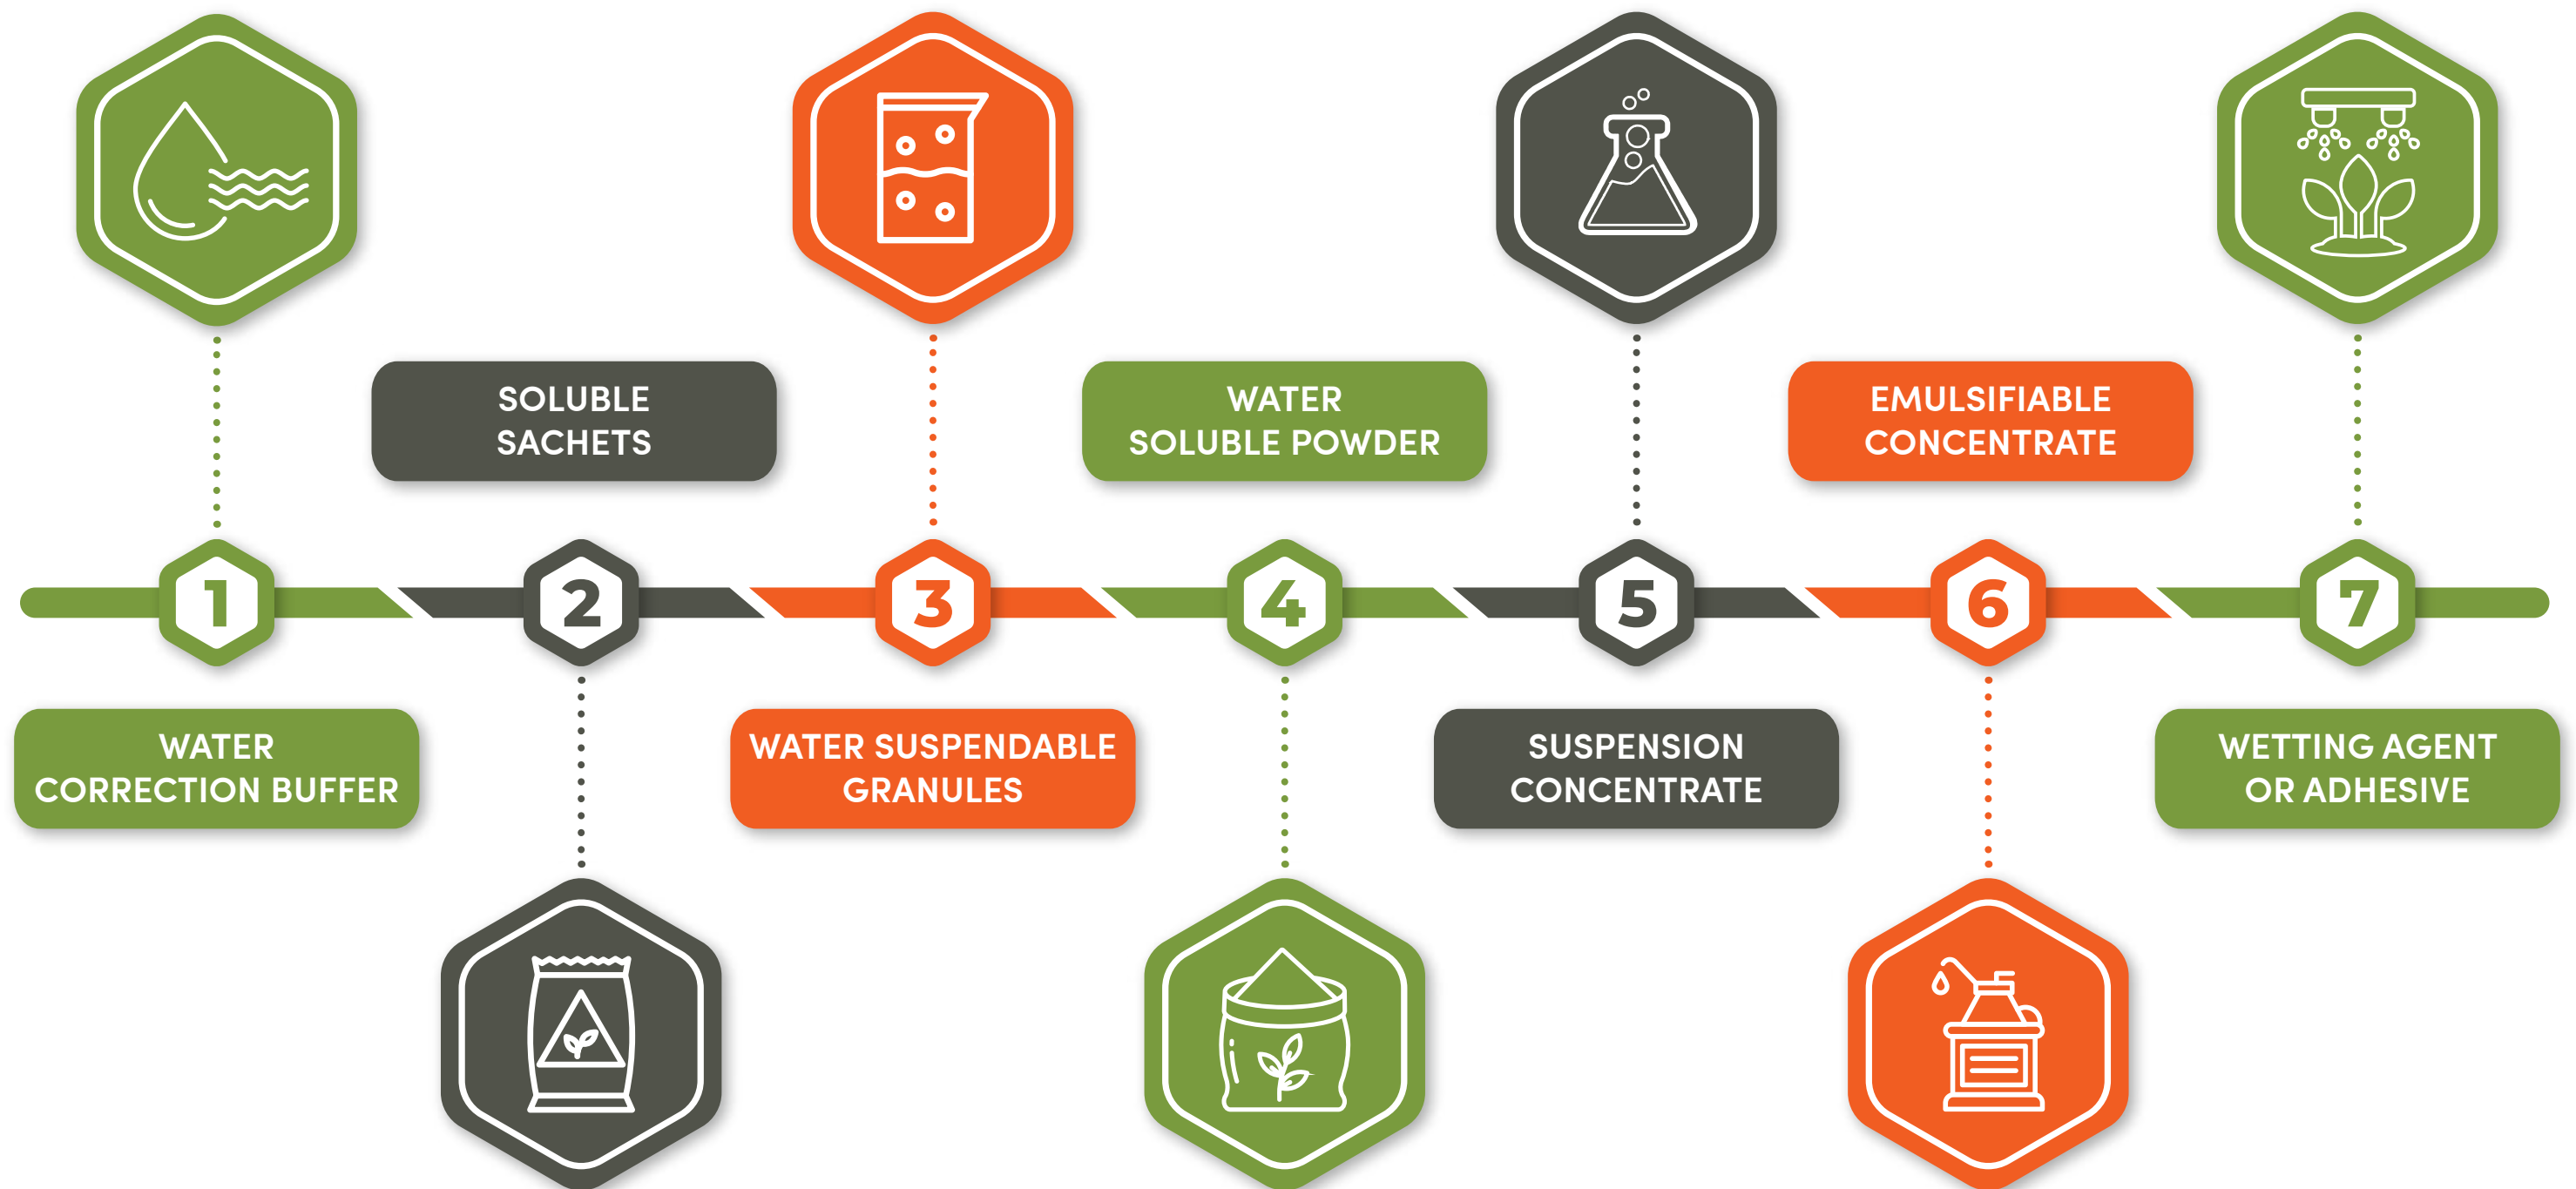

All chemical containers must be accompanied with a label

Product that waste should be diluted with sawdust or sand & be disposed of in a suitable way
