

# SAFETY DATA SHEET

## EmGee

### 1. CHEMICAL PRODUCT & COMPANY IDENTIFICATION

**Product Name:** EmGee  
**Other identifier:** Chlorimuron-ethyl 250 g/kg WDG  
**Pesticide Classification:** Herbicide  
**Restrictions on use:** Agriculture

**Supplier**

Enviro Bio-Chem (Pty) Ltd  
 Co. Reg. No.: 2013/194774/07  
 44 Kerk Street, Lichtenburg  
 North West, South Africa 2740

**Registration Holder**

Erintrade CC t/a RT Chemicals  
 Co. Reg. No.: CK2001/036403/23  
 44 Kerk Street, Lichtenburg  
 North West, South Africa 2740

**Telephone:** +27 12 006 0063  
**Fax:** 086 541 7948  
**Website:** www.envirobiochem.co.za

**24 Hr Emergency Number:** Spillage: 0861 000 366

**In case of Poisoning:**

Griffon Poison Information Centre: +27 82 446 8946  
 Tygerberg Hospital: (+27 21) 931 6129  
 Poison Emergency Enquiries: (+27 21) 689 5227

### 2. HAZARD IDENTIFICATION

UN GHS, Regulation EC 1272/2008 [EU-GHS/CLP] EU & SANS 10234:2008		
Hazard classes	Hazard categories	Hazard statements
Aquatic Toxicity Acute	Category 1	H400
Aquatic Toxicity Chronic	Category 1	H410

**The most important adverse effects:**

**The most important adverse physiochemical effects:** None Known.

**The most important adverse human health effects:** None Known.

**Label elements:**

**Signal word:** Warning

**Hazard statements:**

H400: Very toxic to aquatic life.  
 H410: Very toxic to aquatic life with long lasting effects.

**Precautionary statements:**

P102: Keep out of reach of children.  
 P103: Read label before use.

P273: Avoid release to the environment.

P391: Collect spillage.

P501: Dispose of contents/container in accordance with local/regional/ national regulations.

### 3. COMPOSITION / INFORMATION ON INGREDIENTS

**Substances/ Mixture:** Mixture

**Composition:**

Chemical Name	CAS	Conc. (m/m%)	Classification EC 1272/2008
Chlorimuron-ethyl	90982-32-4	26.5%	Aquatic Acute (Category 1) H400 Aquatic Chronic (Category 1) H410
lauryl sodium sulfate	151-21-3	<70%	Acute Toxicity Oral (Category 4) H302 Skin Irritation (Category 2) H315 Eye damage (Category 1) H318 Aquatic Chronic (Category 3) H412

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

### 4. FIRST AID MEASURES

Remove the victim from the area of exposure. Wash off remaining material with plenty of water. In the event of any complaints or symptoms, avoid further exposure and consult a doctor / poison control centre.

**Inhalation:** Remove person from contaminated area to fresh air and assist breathing as needed. Seek medical attention if irritation persists / person feels unwell. Seek medical attention if you feel unwell after inhalation.

**Skin:** Remove contaminated clothing and shoes. Gently wipe off excess chemical. Wash skin gently and thoroughly with water and non-abrasive soap. Obtain medical attention if irritation persists / person feels unwell.

**Eyes:** Flush eyes with clean water. Lift eyelids to facilitate irrigation. If present, remove contact lenses and continue rinsing. Seek medical attention if irritation persists.

**Ingestion:** Seek medical attention or call a poison control centre for treatment advice. Do not induce vomiting unless instructed to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. If the person is alert, rinse mouth thoroughly with water. If swallowed, get emergency medical help immediately.

**Anticipated acute effects:** None known.

**Anticipated delayed effects:** None known.

**Most important symptoms/effects:** None known.

**Advice to physician:** Treat symptomatically and supportively. No specific antidote known.

### 5. FIRE FIGHTING MEASURES

**Suitable Extinguishing Media:** Use carbon dioxide, dry powder, or alcohol-resistant foam for small fires and water spray can be used for larger fires or cooling of unaffected stock but avoid the accumulation of polluted run-off from the site. Use as little water as possible.

**Unsuitable Extinguishing Media:** Hazardous decomposition products in case of fire: Refer to Section 10: Stability and Reactivity.

**Specific hazards:** None known.

**Special Fire Fighting Procedures:** Remove spectators from surrounding area. Isolate the fire area and evacuate all personnel downwind of the fire. Fight fire from maximum distance and use unmanned hose holder or monitor nozzles. Keep upwind. Avoid inhaling hazardous vapours and fumes from burning materials. Remove container

from fire area if possible and without risk. Do not use high volume water jet, due to contamination risk. Do not scatter the burning material. Water can be used to cool unaffected containers but must be contained for later disposal. Contain fire control agents for later disposal. Avoid pollution of waterways by run-off from the site.

**Personal protective equipment:** Wear NIOSH/MSHA approved self-contained breathing apparatus and full protective gear.

---

## 6. ACCIDENTAL RELEASE MEASURES

**Personal Precautions:** Avoid breathing dust. Avoid contact with eyes and skin. Do not breathe in spray mist or dust. Ventilate area of spill, especially in contained areas.

**Protective equipment:** Refer to Section 8 for personal protective equipment to be worn during containment and clean-up of a spill involving this product.

**Emergency procedures:** Alert firefighting personnel, evacuate unprotected personnel and animals.

**Environmental Precautions:** Prevent spilled product from entering sewers, waterways or ground water. This product is classified as very toxic to aquatic organisms with long-term adverse effects in the aquatic environment. Any spillages or uncontrolled discharges into watercourses should be reported immediately to the police and the Department of Water/Environmental Affairs.

**Methods and Materials for Containment:** Contain spilled product by diking area with sand or earth. Absorb with materials such as: sand, earth, vermiculite, or diatomaceous earth. Collect in suitable and properly labelled containers.

**Methods and Materials for Clean-up:** Contain spilled product by picking up with an electrically protected vacuum cleaner or by wet-brushing and transfer to a container for disposal. Do not create a powder cloud by using a brush or compressed air. Label containers with the contents and dispose of according to local regulations. Do not place spilled material back in original container. Do not re-use spilled material. To decontaminate the spill area, tools and equipment, wash with water and suitable detergent. Collect washings and add to the drums already collected. Do not flush spilled material or washings into drains or waterways. See section 13 for disposal considerations.

---

## 7. HANDLING AND STORAGE

### Handling:

**Precautions for safe handling:** Avoid contact with skin, eyes, and clothing. Do not breathe dust or spray mist. Ensure adequate ventilation during handling and use. Do not handle broken packages without protective equipment. Immediately clean up spills that occur during handling. Keep containers closed when not in use. In the case of contact with the product refer to First Aid Measures – Section 4.

**General occupational hygiene:** Handle in accordance with good industrial hygiene and safety practice. Handle in accordance with good industrial hygiene and safety practice. Wash hands before eating, drinking, chewing gum, smoking, using the toilet or applying cosmetics. Worker should shower at the end of each workday. Wash all clothing before it is re-used.

### Storage:

**Conditions for safe storage:** Keep under lock and key and out of reach of unauthorised persons, children and animals. Store in its original, labelled container, tightly closed, in an isolated, dry, cool and well-ventilated area. Avoid excess heat. Not to be stored next to foodstuffs, feed and water supplies. Avoid cross contamination with other pesticides and fertilisers.

**Incompatible substances and mixtures:** Refer to product label.

---

## 8. EXPOSURE CONTROL / PERSONAL PROTECTION

### Exposure Limits:

No information available.

**Engineering Controls:** It is essential to provide adequate ventilation. The measures appropriate for a particular worksite depend on how this material is used and on the extent of exposure. Local Exhaust: Provide general or local exhaust ventilation systems to maintain airborne concentrations below OELs or other specified exposure limits. Local exhaust ventilation is preferred. Ensure that control systems are properly designed and maintained. Comply with occupational safety, environmental, fire, and other applicable regulations.

**Personal Protective Equipment:**

**Respiratory Protection:** For most well-ventilated conditions, no respiratory protection should be needed. If used in a poorly ventilated area (airborne concentrations exceed exposure limits), use a NIOSH approved air-purifying respirator.

**Hand Protection:** The use of chemically protective gloves is recommended to prevent against skin contact. Examples of preferred glove barrier materials include Nitrile/butadiene rubber, Polyethylene, Ethyl vinyl alcohol laminate, Polyvinyl alcohol, Polyvinyl chloride.

**Eye Protection:** The use of chemical safety goggles is recommended to prevent against eye contact. Contact lenses are not protective eye devices.

**Skin and Body Protection:** Employee must wear appropriate protective clothing; boots, hat and equipment to prevent repeated or prolonged skin contact with this substance.

**Emergency eyewash:** Where there is any possibility that an employee's eyes may be exposed to this substance; the employer should provide an eye wash fountain or appropriate alternative within the immediate work area for emergency use.

**Environmental exposure controls:** Prevent product from entry into sewers and water courses.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Solid Granules
Colour	Ivory
Odour	None
Odour threshold	No data available
pH	No data available
Melting point / freezing point (° C)	No data available
Boiling point (° C)	No data available
Flash point (° C)	No data available
Evaporation rate	No data available
Flammability	No data available
Upper /lower flammability limits	No data available
Vapour pressure	No data available
Vapour density	No data available
Relative density (25°C)	No data available
Water solubility (g/l) at 20°C	Dispersible in water
Partition coefficient: n-octanol/water partition coefficient	No data available
Auto-ignition temperature (° C)	No data available
Decomposition temperature (° C)	No data available
Viscosity, dynamic (mPa s)	No data available
Explosive properties	No data available
Oxidising properties	No data available
Explosive limits	No data available

## 10. STABILITY AND REACTIVITY

**Chemical Stability:** The product is stable for two years at ambient temperature and pressure, under normal storage and handling conditions. Avoid storage under extreme temperatures and conditions. Store below 50 °C, preferably below 30 °C, and not for prolonged periods in direct sunlight.

**Reactivity:** No dangerous reaction known under conditions of normal use.

**Possibility of Hazardous Reactions:** Will not occur.

**Conditions to Avoid:** Avoid the formation of dust clouds. To avoid thermal decomposition, do not overheat.

**Incompatible Materials:** None known.

**Hazardous Decomposition Products:** Toxic materials are formed during exposure to high temperatures, (may include but not limited to carbon monoxide and carbon dioxide).

## 11. TOXICOLOGICAL INFORMATION

### ACUTE TOXICITY:

Calculated according to GHS:

**Acute Oral LD<sub>50</sub> (rat):** > 5000 mg/kg

**Acute Dermal LD<sub>50</sub> (rat):** > 2000 mg/kg

**Acute Inhalation LC<sub>50</sub> (rat, 4 hr):** > 5 mg/l air.

**Skin Irritation:** Not classified.

**Eye Damage/Irritation:** Not classified.

**Skin Sensitization:** Not classified.

**Respiratory Sensitization:** Not classified.

**Reproductive cell mutagenicity:** Not classified.

**Carcinogenicity:** Not classified.

**Reproductive toxicity:** Not classified.

**Specific target organ toxicity – single exposure:** Not classified.

**Specific target organ toxicity – repeated exposure:** Not classified.

**Aspiration hazard:** Not classified.

**Chronic Effects (other targets e.g. developmental):** Not classified

## 12. ECOLOGICAL INFORMATION

The product is classified as a marine pollutant.

### ECOTOXICITY DATA:

**Active ingredient: Chlorimuron-ethyl tech CAS No. 90982-32-4**

**Fish**

LC<sub>50</sub> (96 hr) >1000 mg/l (trout); >100 mg/l (bluegill sunfish)

**Daphnia**

LC<sub>50</sub> (48 hr) 1000 mg/l

**Algae**

Static test EC<sub>50</sub> (72h) No information available.

### **Birds**

Acute oral LD<sub>50</sub> 14 days >2510 mg/kg mallard ducks  
 Dietary LC<sub>50</sub> 8 days >5620 mg/kg diet bobwhite quail and mallard ducks

### **Bees**

Toxicity to bees LD<sub>50</sub> (48 h) >12.5 µg/bee.

### **Worms**

LC<sub>50</sub> (14d) >4050 mg/kg soil (*Eisenia fetida*)

**Biodegradability:** Microbial degradation of chlorimuron-ethyl is slow in all soil pH conditions with an average half-life of 7 to 8 weeks. Chlorimuronethyl persists longer in high pH soils.

**Bioaccumulation:** No data available.

**Mobility:** In acidic soil with high organic matter (pH 4.5, 5.6% o.m.), the Kd value is greater than 1.660, indicating strong sorption to soil particles and thus low mobility. In moderately acidic soil (pH 5.8, 4.3% o.m.), the Kd drops to 0.28, reflecting moderate mobility. However, in more neutral to slightly alkaline soils with lower organic matter (pH 6.5 and 6.6 with 2.1% and 1.1% o.m., respectively), Kd values fall below 0.03, indicating very high mobility and potential for leaching. This pattern suggests that the chlorimuronethyl becomes increasingly mobile as soil pH rises and organic content decreases, posing a greater risk of groundwater contamination in such environments.

## **13. DISPOSAL CONSIDERATION**

**Pesticide Disposal:** Open dumping or burning of this pesticide is prohibited. Waste resulting from the use of this product cannot be reused or re-processed. Never pour untreated waste or surplus product into public sewers or where there is any danger of run-off or seepage into water systems. Do not contaminate rivers, dams or any other water sources with the product or used containers. Comply with local legislation applying to waste disposal. The product may be taken to a registered waste disposal site or incineration plant.

**Package Product Wastes:** Emptied containers retain vapour and product residues. Observe all labelled safeguards until container is cleaned, reconditioned or destroyed. Thereafter, rinse the container three times with a volume of water equal to a minimum of one third of that of the container. Puncture the triple rinsed container and dispose of via an approved collector or recycler ([www.croplife.co.za](http://www.croplife.co.za)). Do not bury, burn or donate the container to any other parties that may use it as a container for food or beverages.

## **14. TRANSPORT INFORMATION**

<b>UN Number</b>	3077
<b>Road Transport ADR/IRD:</b>	
Class:	9
Packaging group:	III
UN proper Shipping Name:	Environmentally Hazardous; Solid; N.O.S. (Chlorimuronethyl 250 g/kg).
<b>Maritime Transport IMDG/IMO:</b>	
Class:	9
Packaging group:	III
UN proper Shipping Name:	Environmentally Hazardous; Solid; N.O.S. (Chlorimuronethyl 250 g/kg).
<b>Marine Pollutant (Y/N):</b>	Yes
<b>Air Transport IATA/ICAO:</b>	
Class:	9
Packaging group:	III
UN proper Shipping Name:	Environmentally Hazardous; Solid; N.O.S. (Chlorimuronethyl 250 g/kg).

## **15. REGULATORY INFORMATION**

**Safety, health and environmental regulations/legislation for the mixture:**

**Relevant information regarding authorization:** Occupational Health and Safety Act 1993. Regulation for Hazardous Chemical Agents, 2021. UN Recommendations on the Transport of Dangerous Goods Model Regulations Rev. 21 (2019), Globally Harmonized System of Classification and Labelling of Chemicals (GHS) Rev 8, 2019.

**Relevant information regarding restrictions:** None.

**EU regulation:** Regulation EC1272/2008 (EU-GHS/CLP)

**Other national regulations:** National Road Traffic Act, 1996 (ACT NO. 93 of 1996). SANS 10228:2012- The identification and classification of dangerous goods for transport by road and rail modes. National Environmental Management Waste Act 59 of 2008. Act 36 of 1947 of the Republic of South Africa. This product is registered under it is a violation of South African law to use this product in any manner inconsistent with its approved labelling. Read and follow all label directions

**Chemical Safety Assessment carried out?** No

---

## 16. OTHER INFORMATION

**Note:** Read and understand all the information on the product label before using the product.

**Other hazard statements, abbreviations and explanations:**

**H400:** Very toxic to aquatic life.

**H410:** Very toxic to aquatic life with long lasting effects.

**IATA:** International Air Transport Association.

**IBC:** International Bulk Chemical.

**ICAO:** International Civil Aviation Organization.

**IMDG:** International Maritime Dangerous Goods

**IMO:** International Maritime Organization.

**LD50 value:** The median lethal dose or the amount of a toxic agent that is sufficient to kill 50 percent of a population within a certain period of time.

**OEL/RL:** Occupational exposure limit-recommended limit.

**TWA:** Time-weighted average – The average exposure over a specified period, usually a nominal eight hours.

**ST/STEL:** Short-term exposure limits.

**Disclaimer:** The information on this sheet is not a specification; it does not guarantee specific properties. The information is intended to provide general guidance as to health and safety based upon our knowledge of the handling, storage and use of the product. It is not applicable to unusual or non-standard uses of the product, nor where instructions or recommendations are not followed.

All information is given in good faith but without guarantee in respect of accuracy, and no responsibility is accepted for errors and omissions or the consequence thereof.
