WARNINGS:

- Causes serious eye irritation

Although this remedy has been extensively tested under a large variety of conditions the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal soil, climatic and storage conditions; quality of dilution water, compatibility with other substances not indicated on the label and the occurrence of resistance of the pest to the remedy concerned as well as by the method, time and accuracy of application. The registration holder further does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animal or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in event of any uncertainty.

PRECAUTIONS:

- Wash hands thoroughly after handling.
- Do not touch eyes.
- Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing.
- If eye irritation persists: Get medical help.

RELEVANT SUBSTANCES:

Substance name (IUPAC/EC)	Concentration % by weight
Fipronil	0.042%
Organic acid	0.2%
Wetter	0.27%

DIRECTIONS FOR USE: Use only as directed.

FOTON® should be placed in the apple orchards before blossom. It is recommended to have fitted all the trees in an orchard with FOTON® by the end of September.

Foton is fitted around the trunk of the tree and the ends connected. The ends easily fit into each other so that FOTON® fits around the tree trunk without falling off. Ensure that the ends tightly fit into each other to ensure them not to loosen during growing season. FOTON® is cut to a specific length to fit around a tree trunk. FOTON® is fitted halfway between ground level and the first frame branches.

NB. FOTON® will be effective only if no bridges such as weeds growing up into trees and/or tree branches or shoots touch the ground that will give alternative routes for the weevils to crawl up the tree.

It is recommended to replace FOTON® after 12 months. It may be placed in the same position and it is not necessary to remove the previous FOTON®.
